

Graduation Requirements

The following Center Board of Education policy guidelines apply to graduation from the Center School District:

1. The State of Missouri requires students to pass the U.S. and Missouri Constitution tests before graduation. Students are given this test following the successful completion of Government during grade 11.
2. The State of Missouri requires all students to complete instruction in CPR (30 min).
3. Credit may be earned and counted toward high school graduation requirements through:
 - a. Extension and correspondence courses from accredited public institutions of higher education
 - b. Summer school from approved public institutions
 - c. School-approved adult education courses
4. Credit for off-campus instruction under the guidance and direction of the school faculty may be granted for programs approved by the State Department of Education.
5. When transfer students are unable to meet Center School District graduation requirements, exceptions may be made which will permit them to graduate if:
 - a. They have done satisfactory work since the date of transfer.
 - b. They have been unable to meet specific requirements due to conditions beyond their control.
 - c. They would have graduated from their former school had they not transferred.

Curricular Areas	Requirements
English Language Arts	4.0 Credits/Units Must include 1 English Language Arts credit for grades 9 - 12. Must take DESE English II End of Course Exam
Mathematics	3.0 Credits/Units Must include 1 credit Algebra I, 1 credit Geometry, 1 credit Algebra II. Must take DESE Algebra I or II End of Course Exam
Science	3.0 Credits/Units Must include 1 Biology credit. Must take DESE Biology End of Course Exam
Social Studies	3.0 Credits/Units Must include 1 credit American History, 1 credit World History, 1 credit Government. Must take DESE Government End of Course Exam, US Constitution, MO Constitution, and American Civics Exams
Physical Education	1.0 Credit/Unit Must take CPR and Heimlich Exams
Fine Arts	1.0 Credit/Unit
Speech	0.5 Credit /Unit Requirement fulfilled by successful completion of Speech, Debate or Theater Arts
Practical Arts	1.0 Credit/Unit
Health	0.5 Credit/Unit
Personal Finance	0.5 Credit/Unit
Additional Electives	8.0 Credits/Units

Post-Secondary Education Admission Requirements

Curricular Areas	Missouri Public 4 Year College Credit Requirements	Community & Technical Colleges (I.E. Metropolitan Community Colleges)	Military	Apprenticeships
English Language Arts	4 Credits/Units	High School Diploma or Equivalency	High School Diploma or Equivalency	High School Diploma or Equivalency
Mathematics	3 Credits/Units Algebra I & Higher			
Science	3 Credits/Units No General Science 1 Must Be a Lab Class			
Fine Arts	1 Credit/Unit			
Practical Arts	0 Credits/Units			
Physical Education	0 Credits/Units			
Foreign Languages	2 Credits/Units of the Same Foreign Language			
Additional Requirements	Appropriate class rank and ACT score			

Missouri State High School Activities Association Eligibility (MSHSAA)

Knowing and following all MSHSAA standards will enable a student to protect his/her eligibility for MSHSAA interscholastic competition. Activity participation should be for all students making appropriate progress toward graduation and otherwise in good standing.

1. Grades received in the preceding semester will determine eligibility to participate in interscholastic activities.
2. The student shall have earned, in the preceding semester, a minimum of 3.0 units of credit.
3. The student shall currently be enrolled in and regularly attending courses that offer 3.0 units of credit. (student aides, etc. does not count as a full class).
4. Beginner ninth grade students shall have been promoted from the eighth grade to the ninth grade for first semester of eligibility.
5. A student must be making satisfactory progress towards graduation as determined by local school policies. There is a maximum age limit for participation.
6. Online Students planning to participate should visit with their counselor or Activities Director to make sure they will be eligible to participate in MSHSAA sanctioned activities. More information can be found at: www.mshsaa.org

Advanced Studies

Dual Credit, AP, and Honors courses receive extra weight in the grading system. Students and their families should meet with a school counselor to explore opportunities and options available through these programs. Please be aware that awarding college credit is determined by individual credentialing institutions and universities.

Advanced Placement (AP)

Center High School offers several AP courses to students. All AP courses culminate in the comprehensive AP examination administered by the College Board. Most colleges and universities will accept successful completion of the exam for either advanced placement alone or for dual credit and advanced placement. Current information regarding college and university recognition policies can be found on the College Board website. Students enrolled in AP courses are required to take the corresponding examination to receive the 1.0 weighted credit. Failure to take the AP examination will result in a reduction of weighted credit for that course.

AP courses offered:

- AP English Language & Composition
- AP English Literature & Composition
- AP Biology
- AP Chemistry
- AP United States Government & Politics
- AP United States History
- AP Psychology
- AP Spanish

Dual Credit

Students enrolled in dual credit courses must meet or exceed eligibility requirements established by the Missouri Coordinating Board for Higher Education. Eligibility is defined as “Those students who meet the minimum grade point average requirements, satisfactory scores on subject matter tests, guardian permission, and recommendation of a content teacher and administrator.” An ACT score is required by some institutions that use placement tests to assess students’ readiness for college-level courses. The score will depend on the credentialing institution. A GPA of at least 3.0 is required by some institutions to enroll in dual credit courses. See your counselor for more details.

Dual credit courses offered:

- Dual credit English
- Dual credit College Algebra
- Dual credit Calculus
- Dual credit Precalculus
- Dual credit Statistics
- Dual credit Entrepreneurship
- Dual credit Spanish
- Dual credit Leadership

Honors Courses

Honors courses require students to utilize advanced critical thinking, problem solving, and content-specific skills and knowledge. Honors courses are fast-paced and are designed to prepare students for subsequent AP and dual enrollment courses.

Honors Courses offered:

- Honors English 9
- Honors English 10
- Honors Algebra II
- Honors Geometry
- Honors Biology
- Honors Chemistry
- Honors Physical Science
- Honors Modern World History
- Honors Art

Course Descriptions

Language Arts

Advanced Placement English Language & Composition: 1 Credit

Grades: 11 - 12

Prerequisites: Successful completion of Honors English 10 and Teacher Recommendation

AP English Language and Composition is an introductory college-level composition course. Students cultivate their understanding of writing and rhetorical arguments through reading, analyzing, and writing texts as they explore topics like rhetorical situations, claims and evidence, reasoning and organization, and style.

AP information can be found under the Advanced Studies section.

Advanced Placement English Literature and Composition: 1 Credit

Grade 12

Prerequisites: Successful completion of AP English Language & Composition

AP English Literature and Composition is an introductory college-level literary analysis course. Students cultivate their understanding of literature through reading and analyzing texts as they explore concepts like character, setting, structure, perspective, figurative language, and literary analysis in the context of literary works.

AP information can be found under the Advanced Studies section.

Debate: 0.5 Credit

Grades 9 - 12

Prerequisites: None

Debate provides students with a general study of the techniques of interscholastic debate. Students are involved in detailed and extensive analysis of debate theory and technique with application of skills in competition. Help in guiding and developing novice debaters is an inherent part of the class work. Participation in the interscholastic Debate/Forensics program is a requirement. This course may be repeated for additional credit. This course cannot be used for Language Arts credit.

Dual Credit English Language Arts: 1 Credit

Grade: 12

Prerequisites: Successful completion of either AP English Language & Composition or English 11 and English 11 Teacher Recommendation

This course uses the text and syllabus provided by the accrediting institution and focuses on the study and practice of expository writing and analytical and critical reading. It requires the study of basic rhetorical principles and the practice of those principles in frequent short papers and close reading of models of expository prose. All students should be able to manage a rigorous load and be competent readers and writers. Second semester, the course introduces students to writing about literature at the college level. The focus is on getting students to an analytical level in their thinking about literature and then responding to different genres of writing (drama, fiction, and poetry) through essay writing. Reading involves literary experiences through a combination of classic and contemporary writing. Students may choose to take this course for dual credit.

Dual credit information can be found under the Advanced Studies section.

English Language Arts 9: 1 Credit

Grade 9

Prerequisites: None

Students develop critical reading literacy, reading comprehension, and increase writing proficiency. Students are introduced to the major literary themes in a survey of culturally diverse western literature that includes short stories, poetry, drama, and a variety of nonfiction selections.

English Language Arts 10: 1 Credit

Grade 10

Prerequisites: Successful completion of English Language Arts 9

Students explore themes from selected readings in world literature as they practice comprehension skills while reading fiction (short stories, novels, poetry, and drama) and nonfiction works. Students analyze the selections as they relate to the individual, the community, the nation, the world, and the history of man. Essential writing skills are practiced in essays.

English Language Arts 11: 1 Credit

Grade 11

Prerequisites: Successful completion of English Language Arts 10

This course acquaints students with reading major American authors and writing about the literature that is studied. The course includes reading selections written by authors who have had a significant influence on American literature from colonial to modern times. Life Skills in reading comprehension, listening, speaking, and writing compositions are reinforced through classroom activities.

English Language Arts 12: 1 Credit

Grade 12

Prerequisites: Successful completion of English Language Arts 11

English Language Arts 12 is a year-long class that seeks to offer the best of contemporary, British, and world literature. Students may explore a variety of genres such as non-fiction, satire, mystery, science fiction, poetry, and drama. Since this course celebrates the diversity of genres in our culture, students will analyze and interpret the roles of these genres in their lives. Through reader response, literary analysis, and persuasive writing, students will continue to improve and develop their personal writing skills. Emphasis also will be placed on reading strategies to prepare students for successful post-secondary and lifelong reading.

Honors 9 English Language Arts: 1Credit

Grade 9

Prerequisite: 8th Grade ELA Teacher Recommendation

The pace of the Honors course accelerates the reading schedule and increases the amount of writing composition. The Honors course offers a deeper analysis of the canonical literature for freshmen English. The vocabulary, grammar, and composition are geared toward high achievements on the ACT/SAT preparation.

Honors information can be found under the Advanced Studies section.

Honors 10 English Language Arts: 1 Credit

Grade 10

Prerequisites: Successful completion of Honors English Language Arts 9

The pace of the Honors course accelerates the reading schedule and increases the amount of writing composition. The Honors course offers a deeper analysis of canonical literature. Students regularly present expository and persuasive presentations in the Honors class. They develop research skills and analyze non-fiction. There is special attention to preparing for the PSAT during the first semester as well as preparation for ACT and English II EOC.

Honors information can be found under the Advanced Studies section.

Reading: 1 Credit

Grade 9 – 10

Prerequisites: English Language Arts 8 or 9 Teacher Recommendation

This course is a comprehensive reading intervention course designed to help students who struggle with fluency and reading comprehension. Enrollment in this course is based on Teacher Recommendation and students' Northwest Evaluation Association (NWEA) score.

Reading/Writing Essentials: 1 Credit

Grades 9 - 12

Reading/Writing Essentials is specially designed instruction provided to eligible students who have demonstrated a need for additional support in the areas of reading and/or written expression. Differentiated instructional strategies are provided to improve students' understanding of the essential components of reading (phonemic awareness, phonics, vocabulary development, reading fluency and reading comprehension) and develop essential writing skills needed to be successful in the high school

English Language Arts (ELA) curriculum. Students in this course will receive individualized instruction to develop needed skills, as determined by their IEP goals.

Enrollment in this course is based on the Individual Education Program (IEP) team decision.

Speech: 0.5 Credit

Grades 9 - 12

Prerequisites: None

Students will demonstrate an understanding and application of the techniques used in formal public speaking including listening skills, speech preparation, and research methods. Activities involve preparing speeches to inform, entertain and persuade as well as panel discussions and oral interpretation of literature. This course is designed for college-bound seniors or students entering the workforce who desire effective English communication skills.

Yearbook: 1 Credit

Grades 9 - 12

Prerequisites: Student application and Teacher Recommendation

Students selected for this course will have the responsibility of producing the high school yearbook. While planning the pages of the year- book, students will be instructed in basic principles of magazine layout and graphic arts. Students will also write feature stories to be used in the various sections of the yearbook. Students are required to sell advertising to finance the publication. Students are required to attend after-school activities and events on a frequent basis.

Mathematics

Algebra I: 1 Credit

Grades 9-10

Prerequisites: none

This course will include operations on real numbers, solving equations and inequalities, analyzing various forms of functions (linear, quadratic, absolute value, exponential and sequences), and using introductory statistics to organize and make predictions. This course is the foundation for further mathematical understanding.

Algebra II: 1 Credit

Grades 9-12

Prerequisites: Successful completion of Algebra I and Geometry

This course includes the study of a variety of functions (linear, quadratic higher order polynomials, exponential, absolute value, logarithmic and rational) learning to graph, compare, perform operations and manipulate them to solve, analyze and apply to problems. Students will use probability and statistics to evaluate outcomes of decisions. Students develop rigorous problem-solving skills, logical reasoning, and mathematical communication skills required for success in higher math courses and real-life experiences.

Algebra Plus: 1 Credit

Grade 9

Prerequisites: 8th Grade Math Teacher Recommendation

This course is designed to provide 9th grade students with a strong foundation in the skills required to be Algebra-ready. Students will study proportional, algebraic, geometric, and statistical relationships. Students will enroll in Algebra I the following year.

Dual Credit College Algebra: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Algebra II with Teacher Recommendation or Honors Algebra II

Review of elementary algebra, solution of equations, functions, exponential and logarithmic functions, inequalities, systems of linear equations, equations of second degree and their graphs, binomial theorem, complex numbers, and polynomials.

Dual credit information can be found under the Advanced Studies section.

Dual Credit Calculus: 1 Credit

Grades 11-12

Prerequisites: Successful completion of Dual Credit Precalculus with a C or higher and a Teacher Recommendation

Dual Credit Calculus is designed for serious and motivated college-bound students planning to major in math, science, or engineering. It consists of an intense treatment of topics in Calculus with heavy emphasis on their theoretical basis. These topics include a continuation of integration, integration techniques, L'Hôpital's Rule, and improper integrals.

Dual credit information can be found under the Advanced Studies section.

Dual Credit Precalculus: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Algebra II or Algebra II Honors and Teacher Recommendation

Review of elementary algebra, solution of equations, functions, inequalities, systems of linear equations, exponential and logarithmic functions, trigonometric functions, trigonometric identities, triangles, equations of second degree and their graphs, binomial theorem, complex numbers, and polynomials.

Dual credit information can be found under the Advanced Studies section.

Dual Credit Statistics: 1 Credit

Grades 11-12

Prerequisites: Successful completion of Algebra II and Teacher Recommendation

An introduction to descriptive and inferential statistics. Organization and presentation of data, averages and variations, elementary probability, random variables, special discrete distributions, normal distributions, sampling distributions, point estimation, confidence intervals, and hypothesis testing.

Dual credit information can be found under the Advanced Studies section.

Geometry: 1 Credit

Grades 9-11

Prerequisites: Successful completion of Algebra I

This course involves the integration of logical reasoning and spatial visualization skills. It includes a study of deductive proofs and applications from Algebra, an intense study of polygons, and an introduction to Trigonometry. Students will be required to “think visually” while transferring information to real life problems.

Honors Algebra II: 1 Credit

Grades 9 - 12

Prerequisites: Successful completion of Algebra I and Geometry and/or Teacher Recommendation

The Algebra II Honors course includes all concepts covered in Algebra II at a more rigorous pace and intense level of study. Additional concepts include probability, statistics, and trigonometric functions.

Honors information can be found under the Advanced Studies section.

Honors Geometry: 1 Credit

Grades 9 - 10

Prerequisites: Successful completion of Algebra I and Teacher Recommendation

A rigorous study of planes and coordinating geometry recommended for the college-bound student. This course will cover areas and volumes of plane and solid figures, coordinate geometry, and basic transformations in addition to the topics discussed in the regular Geometry class. During this intense study, students will develop visual skills and increase their ability to reason logically while preparing for success in higher-level math courses.

Honors information can be found under the Advanced Studies section.

Math Applications: 1 Credit

Grade 12

Prerequisites: Attempted completion of Algebra II and Math Teacher Recommendation

The course allows students to see the differences between earning wages, earning a salary, and working on commission. Accurate checking and savings accounts are investigated as well as the pervasive and persuasive world of credit through banks and lenders. Calculating the cost of owning and operating a car with the necessity of good automobile insurance as well as ACT preparation and practice will also be discussed. Students will discover the many financial and lifestyle decisions they must make when choosing and sharing an apartment. Students explore higher-level mathematics in advanced algebra, probability, and discreet math applications which are used to solve real-life problems.

Parallel Algebra A: 1 Credit

Grade 9-12

Parallel Algebra A is a specially designed instruction provided to eligible students who need to build prerequisite skills and algebraic foundations in preparation for the required End of Course exam. The goal is for students to master the first half of the algebra benchmarks before moving on. Students will receive reinforcement of skills with appropriate scaffolding strategies in this small-group support class designed to ensure that all students can achieve if given the right support at the right time. Grading is based on a district-wide benchmarking system in which students must pass a set of benchmarks to pass the course. Domains will include building functions, interpreting functions, statistics/probability, number systems and quantities, seeing structure in expressions, reasoning with equations and inequalities, linear/quadratic and exponential modeling.

Parallel Algebra B: 1 Credit

Grade 9-12

Parallel Algebra B is specially designed instruction provided to eligible students who need to build on prerequisite skills and algebraic foundations in preparation for the required End of Course exam. The goal is for students to master the second half of the algebra benchmarks before moving on. Students will receive reinforcement of skills with appropriate scaffolding strategies in this small-group support class designed to ensure that all students can achieve if given the right support at the right time. Grading is based on a district-wide benchmarking system in which students must pass a set of benchmarks to pass the course. Domains will include building functions, interpreting functions, statistics/probability, number systems and quantities, seeing structure in expressions, reasoning with equations and inequalities, linear/quadratic and exponential modeling.

Science

Anatomy & Physiology: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Biology

This course is designed to prepare students to pursue post-secondary education and careers in biomedical sciences. Students will explore each system of the human body with a detailed focus on anatomy and physiology. Models and diagrams will be used to learn components of each system. Laboratory work will include dissection and extensive organ dissections. Medical terminology will be emphasized in each system and application of knowledge will be necessary to solve difficult problems related to the human body.

Advanced Placement Biology: 1 Credit

Grades 11-12

Prerequisites: Successful completion of Biology or Biology Honors and Science Teacher Recommendation.

This course is designed to be the equivalent of a college introductory biology course usually taken by biology majors during their first year of college. Three major areas are covered which include molecules and cells, heredity and evolution, and organisms and populations. This is an intense laboratory-based course. Students are expected to take the AP exam in the spring.

AP information can be found under the Advanced Studies section.

Advanced Placement Chemistry: 1 Credit

Grades 11-12

Prerequisites: Successful completion of Chemistry with Teacher Recommendation and Algebra II

Advanced Placement Chemistry is a college level chemistry course, which covers rates of reactions, chemical equilibrium, atomic structure and bonds, KSP, acid-base systems, oxidation- reduction, and qualitative analysis. Extensive laboratory activities are conducted throughout the course and detailed in a laboratory journal. Students are expected to take the AP exam in the spring.

AP information can be found under the Advanced Studies section.

Biology: 1 Credit

Grade 10

Prerequisites: none

Biology is an introductory life science course which focuses on the interaction of living organisms and their environment. This course will focus on the diversity of organisms from their chemical properties through their ecological roles in the environment. In this class, there will be an emphasis on activities and laboratory exercises that will promote problem solving, refine laboratory procedures, and strengthen reading, writing, and math skills. Students will be encouraged to explore personal areas of interest within the topics we explore.

Chemistry: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Biology or Honors Biology

This is a yearlong course in Chemistry which builds upon the introductory material on Chemistry from Freshman year Physical Science. Anticipated topics include Properties of Matter, Periodic Properties, Chemical Bonding, Chemical Formula and Equation Writing, Stoichiometry, States of Matter, and Acids and Bases.

Environmental Science: 1 Credit

Grades 9-12

Prerequisites: none

Environmental Science is a year-long course designed to show thematic connections between a variety of science disciplines including biology, chemistry, and physics. It gives students a coherent and realistic picture of the applications of a variety of scientific concepts as they manifest in our environment. Students will focus on human population growth, natural resources, and ecosystem dynamics.

Honors Biology: 1 Credit

Grades 9-10

Prerequisites: 8th Grade Science Teacher Recommendation

This course is a prerequisite for Advanced Placement Biology and will focus on in-depth concepts in Biology. There will be a focus on three main themes: Molecules of Life, Heredity and Evolution, and Organisms and Populations.

Honors information can be found under the Advanced Studies section.

Honors Chemistry: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Biology Honors with Teacher Recommendation.

Chemistry Honors is an in-depth examination of atomic theory and the periodic table, chemical reactions and stoichiometry, and an introduction to organic chemistry. It is suitable for students with an interest in science, especially those who are considering taking AP chemistry. This course is intensive and requires analytical and problem-solving skills in preparation for laboratory investigations and instruction of content.

Honors information can be found under the Advanced Studies section.

Honors Physical Science: 1 Credit

Grades 9-12

Prerequisites: 8th Grade Science Teacher Recommendation

This course is an advanced introductory science course that helps students understand structures and properties of matter and changes that occur in the natural world. The first semester of physical science focuses on the study of physics, and covers the nature of science, motion, and forces. Newton's three laws, energy, heat, waves, sound, light, electricity, and magnetism. The second semester focuses on the study of chemistry, and covers matter, atoms, elements, the periodic table, chemical bonding and reactions, radioactivity, nuclear reactions, and an introduction to organic chemistry. Each semester, students will participate in labs and activities.

Honors information can be found under the Advanced Studies section.

Horticulture: 1 credit

Grades 10-12

Prerequisites: None

This course is a hands-on, science-based class designed to provide students with the foundational knowledge and practical skills needed for careers or further education in the "green industry." High school horticulture covers the science and art of growing plants, teaching practical skills in plant identification, propagation, landscape design, greenhouse management, soils, pest control, and floral design, while also exploring career paths in landscaping, nursery/retail, and agriculture through hands-on projects like planting, pruning, and maintaining school grounds or community gardens.

Physical Science: 1 Credit

Grades 9-12

Prerequisites: none

This course is an introductory, general science course that helps students understand structures and properties of matter and changes that occur in the natural world. The first semester of physical science focuses on the study of physics, and covers the nature of science, motion, and forces. Newton's three laws, energy, heat, waves, sound, light, electricity, and magnetism. The second semester focuses on the study of chemistry, and covers matter, atoms, elements, the periodic table, chemical bonding and reactions, radioactivity, nuclear reactions, and an introduction to organic chemistry.

Social Studies

Advanced Placement United States Government and Politics: 1 Credit

Grade 11

Prerequisites: Successful completion of World History and American History or AP United States History and Teacher Recommendation

Course Description: AP United States Government develops understanding and analytical perspective on government and politics in the United States. This course includes both the study of general concepts used to interpret U.S. politics and the analysis of specific examples. It requires familiarity with the various institutions, groups, beliefs, and ideas that constitute U.S. politics. Students are expected to take the AP exam in the spring. The state-manned Constitution exam is taken in this course.

AP information can be found under the Advanced Studies section.

Advanced Placement United States History: 1 Credit

Grades 10-12

Prerequisites: Successful completion of World History and Teacher Recommendation

The AP United States History course is for students who wish to complete studies equivalent to an introductory college course in US History. Students should learn to assess historical materials, and to weigh the evidence and interpretations presented in historical scholarship. Students in this course are expected to take the AP exam in the spring.

AP information can be found under the Advanced Studies section.

Advanced Placement Psychology: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Modern World History and Child Development II

Advanced Placement Psychology is designed to introduce students to the systemic and scientific study of behavior and mental processes of human beings and other animals. Students are exposed to the psychological facts, principles, and phenomena associated with each of the major subfields within psychology. They also learn about the ethics and methods psychologists use in their science and practice. Students are expected to take the AP exam in the spring.

AP information can be found under the Advanced Studies section.

Global Connections: 0.5 Credit

Grades 11-12

Prerequisites: None

This Social Studies elective course allows students to understand, analyze, assess, and appraise current events, historical contexts, and cultural relationships. Students will be exposed to a working knowledge of history, civics, geography, and economics to understand the attitudes and skills they need as global citizens in their own community and around the world.

Government: 1 Credit

Grade 11

Prerequisites: Successful completion of Modern World History and American History or AP United States History

This course provides a functional knowledge and practical understanding of the U.S. and Missouri Constitutions, all levels of government and the basics of our economic system. The state-manned Constitution exam is taken in this course.

Honors Modern World History: 1 Credit

Grade 9

Prerequisites: 8th Grade Social Studies Teacher Recommendation

This course is designed to give students an opportunity to learn about the economic, political, and social developments that created the western civilization of which there are a part. The course begins with the Renaissance and Reformation and covers the major events in the world up to the Cold War.

Honors information can be found under the Advanced Studies section.

Modern American History: 1 Credit

Grade 10

Prerequisites: Successful completion of World History

Course Description: This course reviews the Civil War in light of Reconstruction. The course emphasizes 20th Century America in the modern world. Missouri history, American government and economics are included as appropriate.

Honors information can be found under the Advanced Studies section.

Modern World History: 1 Credit

Grade 9

Prerequisites: None

This course provides insight into multiple cultures, ideas, and geographical influences worldwide from the post Renaissance period through the 20th Century.

Sociology: 0.5 Credit

Grades 10-12

Prerequisites: Successful completion of World History and Child Development

In this Social Studies elective, students will explore the origins of our values/beliefs and behaviors and society's behaviors as well as explore the concepts and theories necessary to understand society. Topics include considering sociology as science, the nature of large-and small-scale groups, social stratification, historical eras and social change, and race, ethnic, and gender relations.

Psychology: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Child Development

In this Social Studies elective, students participate in a fascinating survey of the mind and behavior, acting like a "tasting menu" of different psychology fields, covering brain function, mental health, social dynamics, learning, memory, and human development, with a mix of textbook learning, discussions, and sometimes writing, all aimed at making sense of why people do what they do. It's highly relevant to teens, exploring peer pressure, stress, prejudice, and personal growth, often involving reading theories, analyzing research, and applying concepts to real life.

Business & Communication

Accounting: 1 Credit

Grades: 11-12

Prerequisites: Successful completion of Business Technology

Accounting will help students that wish to study business in college, operate his/her own business, or just know more about financial topics that will help throughout his/her financial life. Accounting is a language of business. Anyone planning a career/college major in any area of business should enroll in this course. This course introduces students to recording transactions from source documents, posting journal entries to ledger accounts, checking accuracy, and preparing financial statements. Students will complete both manual and computerized accounting simulations. Excel spreadsheets and/or accounting software are utilized.

Advanced Marketing: 1 Credit

Grades 11-12

Prerequisites: Successful completion of Marketing Concepts. Must be a member in good standing with DECA

Advanced Marketing includes advanced study in business, management and entrepreneurship, communication, interpersonal skills, economics and professional skills development. Students will conduct in-depth marketing research projects that incorporate all aspects of marketing. It is required that all marketing students join DECA within the first two weeks of school.

Broadcast Journalism: 1 Credit

Grades 11-12

Prerequisites: Successful completion of Video Production

Students focus on video technology skills acquired in Video Production. Students gain hands-on experience by writing, directing, and editing their own projects and features for Hive TV.

Business Law: 0.5 Credit

Grades 10-12

Prerequisite: Successful completion of Introduction to Business and Computer Business Applications

This course is designed to introduce students to the study of business law through a brief look at how law developed, the legal system in the United States, the functions of federal, state and local court systems, and civil and contract law. Students will explore developing enforceable contracts, corporate structures, and tort law.

Business Technology: 0.5 Credit

Grades 10-12

Prerequisites: Successful completion of Introduction to Business and Computer Business Applications

Business Technology is intended to provide a solid foundation to students in office technology with reference to careers and career opportunities and provide a working knowledge of how to begin and complete a job search. This course is designed to prepare students for employment in a business-related field.

Computer Business Applications: 0.5 Credit

Grades 9-12

Prerequisites: Successful completion of Introduction to Business

This course is designed to help students review and master beginning and advanced skills in the areas of word processing, spreadsheet applications, multimedia, internet usage, and integrated software applications.

Dual Credit Entrepreneurship: 1 Credit

Grades 11-12

Prerequisites: Successful completion Entrepreneurship and Entrepreneurship Teacher Recommendation

This course introduces students to the excitement and challenges of building their own businesses. It focuses on identifying and evaluating entrepreneurial opportunities, as well as identifying what it takes to get a new venture off the ground. The course is enriched with real-life examples, including case studies of start-ups and personal stories from local entrepreneurs. The instructor emphasizes active, hands-on

learning; additionally, student teams will get a taste for starting and running a company through a computerized business simulation. Students may choose to take this course for dual credit.

Dual credit information can be found under the Advanced Studies section.

Dual Credit Leadership: 0.5 Credit

Grades 11 - 12

Prerequisites: none

This course is available for students with a sincere interest in leadership, how it relates to their current roles as students, and their future roles as productive, professional adults. The primary outcomes for this course will be the development of leadership skills and social action experience. Emphasis will be placed on the study of democratic and political processes, public speaking, goal setting, event and project planning, school service, parliamentary procedure, agenda mapping, committee processes, and meeting facilitation.

Dual credit information can be found under the Advanced Studies section.

Entrepreneurship: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Marketing Concepts

Entrepreneurship teaches students how to start and run their own real businesses, identify feasible business ideas, write professional business plans, create marketing materials, pitch to a panel of live investors, and launch their products or services at a public trade show. By the end of the program, each student has a real business to run, and the skills needed to be successful workers, leaders, and entrepreneurs for the rest of their lives.

Hospitality & Management: 0.5 Credit

Grades 9-12

Prerequisites: None

Hospitality & Management introduces students to the world of hospitality and tourism. In this course, you will learn about opportunities in event planning, recreation management, hotel and restaurant operations, tourism and travel.

Introduction to Business: 0.5 Credit

Grades 9-12

Prerequisites: None

This course gives students an understanding of economic systems and consumerism, providing the resources needed for students to explore business careers and entrepreneurship. The content in this area is vital to the career planning of business students as they develop workplace and personal skills including knowledge of banking, credit, taxes, insurance, investment, and personal finance.

Marketing at Work: 1 Credit

Grade 12

Prerequisites: Successful completion of Advanced Marketing and Marketing Teacher Recommendation

Students enrolled in Marketing at Work are involved in a supervised work study program in the field of Marketing Education. Work Experience provides a transition into the workplace and practice needed to

prepare students for future employment in a business marketing setting. Students must show proof of employment prior to enrollment in the class.

Marketing Concepts: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Introduction to Business and Computer Business Applications

Marketing Concepts develops student understanding of distribution, financing, marketing information management, pricing, product/service management, promotion, and selling. Students enrolled in Marketing Concepts participate in DECA, a student organization that provides opportunities for students to demonstrate their mastery of the marketing curriculum in competitive events, to develop leadership skills, and to exhibit awareness of civic responsibilities. DECA can assist students in receiving scholarships, building a successful resume, and networking with business professionals.

Personal Finance: 0.5 Credit

Grade 11

Prerequisites: None

Personal Finance is a graduation requirement

This is a one-semester course which fulfills the Personal Finance graduation requirement. Content includes information to encourage students to become rational, competent members of the work resources; financial services and responsibilities; responsible use of credit responsibilities of consumers.

Sports Journalism: 1 Credit

Grades 11-12

Prerequisites: Successful completion of Video Production

Sports Journalism students will continue to focus on broadcast communications skills, processes of production and operation of video lab equipment for the purpose of producing live sports broadcasts and sports studio shows. Students will work behind and in front of the camera, in production and on-air roles. Additionally, students will interview coaches and players, gather statistics and research, create a run-down, and produce graphics and other content for live streaming.

Video Production: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Introduction to Business and Computer Business Applications

This course introduces broadcast communications skills, processes of production and operation of video lab equipment. Students plan and organize elements of production including storyboarding, script writing, camera use, sound, and video editing.

Health & Human Services

Advanced Placement Spanish: 1 Credit

Grades 11-12

Prerequisites: Successful completion of Spanish III

This course emphasizes communication by applying interpersonal, interpretive, and presentational skills in real-life situations. This includes vocabulary usage, language control, communication strategies, and cultural awareness. This course is primarily taught in Spanish.

AP information can be found under the Advanced Studies section.

Childcare: 0.5 Credit

Grades 9-12

Prerequisites: Successful completion of Child Development

This course will provide advanced study in child development and guidance. Students will learn practical skills related to guidance and caring for children of various ages in the following areas: physical, social, moral, and intellectual. Students will learn the process of creating a childcare facility. Observation and possible limited experiences in childcare settings will complete this course.

Child Development: 0.5 Credit

Grades 9-12

Prerequisites: None

Child Development provides information about the intellectual, social, emotional, and biological development of children and the skills needed to care for children. Skills related to parent and child, parenting practices, special needs of children, and parental environmental influences on child development. The course will also address the importance of providing appropriate care and guidance for children.

Nutrition & Wellness: 0.5 Credit

Grades 9-12

Prerequisites: None

This course is intended to help students understand the principles of nutrition as well as the relationship between nutrition to health and wellness. Students will also solve problems related to health and wellness, as well as food needs through the application of mathematics and science principles; and make responsible decisions involving family and individual food needs, the use of the food dollar and the care of food.

Dual Credit Spanish: 1 Credit

Grade 12

Prerequisites: Successful completion of Spanish III

Dual Credit Spanish emphasizes the development of Spanish structures and active vocabulary based on oral and written pattern drills. Conversation based on short dialogue containing only structures already practiced. Cultural content is the context for every single assignment and activity that permeates the grammar and vocabulary lessons. Students may choose to take this course for dual credit.

Dual credit information can be found under the Advanced Studies section.

Dual Credit Teacher Education: 1 Credit

Grades: 12

Prerequisites: Successful completion of Child Care, Sociology or Psychology and English 11

Cadet teaching is an introductory teaching course designed to encourage and help high school students who are interested in entering the teaching profession. Cadet teaching (as an elective course) affords students an opportunity to work in the classroom under an experienced, enthusiastic teacher to better understand the teaching profession. Second semester includes practicum experience where students are embedded in elementary buildings to support teachers and gain real world experience in the classroom. Students may choose to take this course for dual credit.

Dual credit information can be found under the Advanced Studies section.

First Responders: 1 Credit

Grades 11-12

Prerequisites: Successful completion of PLTW Human Body Systems

This course offers students a hands-on exploration of various emergency response careers through guest speakers from different fields. During the course, students will gain insight into the challenges and rewards of these professions.

Spanish I: 1 Credit

Grades 9-12

Prerequisites: None

This course is an introduction to the Spanish language with emphasis on pronunciation and conversation comprehension. A study of vocabulary and elementary structure of the language is reinforced through reading, writing, speaking, and listening.

Spanish II: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Spanish I

The second-year emphasis continues with conversation, listening comprehension, reading and writing in Spanish. A review of structure is done with emphasis on the indicative mood. The student will become acquainted with the history and geography of the Latino cultures.

Spanish III: 1 Credit

Grades 11-12

Prerequisites: Successful completion of Spanish II

Course Description: In the third year the emphasis is a continuation of improving listening skills, conversational skills, reading and grammatical structures in Spanish. Students will continue to learn the history and geography of Spanish-speaking cultures. There is a reinforcement of the past tenses with acquisition of new tenses including an introduction to subjunctives and commands.

Sports Medicine and Athletic Training: 1 Credit

Grades: 11-12

Prerequisites: Successful completion of Biology and PLTW Human Body Systems

This course will introduce fields such as athletic training, physical therapy, medicine, fitness, physiology of exercise, kinesiology, and nutrition. It will provide an opportunity for the study and application of the components of sports medicine, athletic injuries, rehabilitation, taping and wrap- ping techniques, first aid, CPR, emergency procedures, human anatomy and physiology and therapeutic modalities/exercise.

Emerging Technology: 0.5 Credit

Grades 10-12

Prerequisites: Successful completion of PLTW IED or Design and Teacher Recommendation

This course focuses on practical application of new technologies that enable companies to remain relevant in a turbulent business environment. During the course, students will develop an understanding of new technologies, their impact on business, and applicability in different business scenarios as well as how to ensure their scalable implementation and proper planning.

Fine Arts (Performing Arts)

Acting: 1 Credit

Grades 9-12

Prerequisites: Successful completion of Theatre Arts

This year-long course offers students the opportunity to further develop their performance skills, focusing on Devised Acting techniques. Devised Acting focuses on scene study, improvisation, directing, movement, script analysis, and writing. Students will write, produce, and perform an original production, which will be open to the public. Students should expect to be challenged.

Technical Theater: 0.5 Credit

Grades 10-12

Prerequisites: Successful completion of Theatre Arts.

This course is designed to aid students in the basic technical elements of theatre. Areas studied include tools, building of scenery, designing of scenery, costumes, make-up, the basic elements of a publicity campaign, lighting and lighting design, lumber and how to prepare a budget for expenses for production. Students will help build production of the main stage shows. Advanced students will have the opportunity to explore an area of specialization and mentor novices.

Theater Arts: 1 Credit

Grades 9-12

Prerequisites: none

This course is designed for students interested in the basics of theatre. Students will study an overview of theatre history, acting and directing, technical design and construction, and script analysis and writing. Students will occasionally perform in class. Participation in main stage shows is encouraged but not required.

Center Choir: 1 Credit

Grades 9-12

Prerequisite: Choir Director Recommendation

Members of the Choir are challenged to develop advanced voice skills, music reading skills, and choral singing skills through the study of a variety of musical styles from all periods of history. Participation in at least one performance each quarter is required as well as participation in the District Music Festival and spring concert tour. Attendance is required at all rehearsals and performances.

Concert Band: 0.5 Credit

Grades 10-12

Prerequisite: Successful completion of Marching Band and Band Director Recommendation

Concert Band presents four concerts, hosts a guest clinician, and participates in State Festival. Individual members of the ensemble may participate in District/ State Solo and Small Ensemble festivals and participate in honor bands. Attendance is required at all rehearsals and performances.

Freshmen Band: 1 Credit

Grade 9

Prerequisite: 8th Grade Band Director Recommendation

This class is designed around highly advanced musical content and requires quality musicianship and self-discipline. The course refines skills in tone production, rhythm study, music notation, dynamics, articulation, musical style, and expression. Performances are a major part of this course. The members of this band combine with the other Band courses to make up the Marching Band. The marching band appears at all home football games and competes in marching competitions. Attendance is required at all rehearsals and performances.

Jazz Band: 0.5 Credit

Grades 10-12

Prerequisite: Band Director Recommendation

Jazz Band is an auditioned band that focuses on performance. Attendance is required at all rehearsals and performances.

Marching Band: 0.5 Credit

Grades 10-12

Prerequisite: Teacher Recommendation

Marching Band is open to anyone enrolled in the Center High School Band program. This ensemble represents Center High School at each home football game, other school activities, in local parades, and in regional competitions. There is a mandatory one-week camp during the summer. During the school year rehearsals are held each school day during the first period. Practice and events inside of the school day are required for the All-District Band and All-State Band. Students must meet MSHSAA and CHS Extracurricular participation requirements to enroll in this class. Attendance is required at all rehearsals and performances.

Music Appreciation: 0.5 Credit

Grades 9-12

Prerequisites: none

Students will grow their understanding of music as they listen to classics from the Baroque period through the Jazz Age. Students will develop their ear to identify instruments, musical pieces, and musical periods by their sound. Students will also learn music terminology and music theory to express in writing accurate descriptions of music.

Show and Jazz Choir: 0.5 Credit

Grades 10-12

Prerequisite: Choir Director Recommendation

Show and Jazz choir is an auditioned choir that focuses on performance. This class incorporates Modern Pop, Theatre, and jazz music along with staging, choreography, and live accompaniment. Attendance is required at all rehearsals and performances.

Fine Arts (Creative)

Ceramics & Sculpture: 0.5 CR

Grades 9-12

Prerequisites: None

Provides a comprehensive study of methods of sculpture, hand-built clay construction, and basic wheel throwing techniques. Students explore three-dimensional design while developing both useful and sculptural forms. Creativity and quality craftsmanship are emphasized.

Design: 0.5 CR

Grades 9-12

Prerequisites: None

This one-semester course is an exploration of digital design skills using the elements of art and principles of design. Students will create artwork using multiple digital platforms.

Drawing and Painting: 0.5 CR

Grades 9-12

Prerequisites: None

This course promotes commitment to the area of drawing and painting through the study of perspective, still life, texture imitation, figure, portraiture, and design. Various drawing materials are used by students to enhance both realistic and abstract drawing skills. Art history is also used as a basis for some projects.

Honors Art: 0.5 Credit

Grades 11-12

Prerequisites: Successful completion of at least one semester (.5 credit) of Art and Teacher Recommendation

This highly individualized and rigorous general art course is designed to help students develop the skills necessary to create quality art- work appropriate for a college-entrance portfolio. Each semester, students will work individually with the instructor to develop and then execute a series of major projects. Possible areas of study include, but are not limited to art, historical inquiry, identity/ cultural studies, and material/process-based technical skills (i.e. drawing, painting, sculpture, ceramics, and photography). Personal initiative, involvement, and development are critical for successful completion of this course. Students will be expected to complete regularly assigned out-of-class sketchbook assignments and contribute to formal and informal as well as written and oral critiques.

Physical Education

Foundations of Physical Education: 0.5 Credit

Grade 9

Prerequisites: None

This course applies to the principles, practices, and the importance of lifelong fitness. Students participate in fitness evaluations to determine fitness goals and participate in a variety of activities to promote overall fitness and health. As a result, students will be able to continue to apply the connection between health and regular physical activity after completing this course. This course cannot be repeated.

Health: 0.5 Credit

Grades 10-12

Prerequisites: None

Health class through the study of nutrition, fitness, exercise, stress management, disease prevention, and substance abuse prevention, and understanding of the body systems will enable students to make life long, healthy decisions. Content learned in this course will provide foundational knowledge applicable to each student's individual success setting short term and long-term healthy living goals.

Team Sports: 0.5 Credit

Grades 10 - 12

Prerequisites: Successful completion of Foundations of Physical Education

Sports and Recreation focus upon rules, etiquette and skill techniques for a variety of sports and recreational activities. Students will participate in fitness testing and fitness activities in the course. Students will experience the connection between personal health and regular physical activity.

Weight Training & Conditioning: 0.5 Credit

Grades 10 - 12

Prerequisites: Successful completion of Foundations of Physical Education

This introductory course emphasizes the development of effective weight training and proper lifting techniques. This course includes the concepts of physical education and the development of personal fitness.

STEAM & Design Academy

Computer Hardware and Operating Systems (CHAOS): 1 Credit

Grades 10-12

Prerequisites: Successful completion of PLTW Computer Science Essentials

CHAOS prepares students for the Test Out PC Pro and CompTIA A+ certification exams. Students use multiple learning formats to learn how to install, manage, and secure computer hardware and master home and corporate OS environments. Students will learn the skills required to work as an IT support professional. They will learn to install, repair, configure, secure, and manage computer hardware, operating systems, and software in home or corporate environments. Additionally, communication, listening, and analysis skills are essential for interacting with customers.

Project Lead the Way Computer Science Essentials: 1 Credit

Grades 9-12

Prerequisites: Successful completion of Algebra I or higher

With emphasis on computational thinking and collaboration, this yearlong course provides an excellent entry point for students to begin or continue the PLTW Computer Science K-12 experience. Computer Science Essentials will expose students to a diverse set of computational thinking concepts, fundamentals, and tools, allowing them to gain understanding and build confidence.

Project Lead the Way Engineering Design and Development: 1 Credit

Grades 11-12

Prerequisites: Successful completion of PLTW POE and Geometry or higher

Engineering Design and Development (EDD) is an engineering research course in which students work in teams to research, design, test, and construct a solution to an open-ended engineering problem. This course is part of the Project Lead the Way (PLTW) engineering curriculum, a capstone project. The product development life cycle and design process are used to guide the team to reach a solution to the problem. The team presents and defends their solution to a panel of outside reviewers at the conclusion of the course. The (EDD) course allows students to apply all the skills and knowledge learned in previous pre-engineering courses.

Project Lead the Way Introduction to Engineering Design: 1 Credit

Grades 9-12

Prerequisites: Successful completion of Algebra I or higher

Students use a problem-solving model to improve existing products and invent new ones, and they apply this model to solve problems in and out of the classroom. Using sophisticated three-dimensional modeling software, students communicate the details of products. Emphasis is placed on analyzing potential solutions and communicating ideas to others.

Project Lead the Way Human Body Systems: 1 Credit

Grades: 10 - 12

Prerequisites: Successful completion of PLTW Principles of Biomedical Sciences

Students examine the interactions of human body systems as they explore identity, power, movement, protection, and homeostasis in the body. Exploring science in action, students build organs and tissues on a skeletal Maniken®; use data acquisition software to monitor body functions such as muscle movement, reflex and voluntary action, and respiration; and take on the roles of biomedical professionals to solve real-world medical cases.

Project Lead the Way Principles of Biomedical Sciences: 1 Credit

Grades 9-12

Prerequisites: None

In the introductory course of the PLTW Biomedical Science program, students explore concepts of biology and medicine to determine factors that led to the death of a fictional person. While

investigating the case, students examine autopsy reports, investigate medical history, and explore medical treatments that might have prolonged the person's life. The activities and projects introduce students to human physiology, basic biology, medicine, and research processes while allowing them to design their own experiments to solve problems.

Project Lead the Way Principles of Engineering: 1 Credit

Grades 10 - 12

Prerequisites: Successful completion of PLTW IED and Geometry or higher

Students enrolled in PLTW Principles of Engineering explore a wide variety of careers in engineering and technology and cover various technology systems and manufacturing processes. Using activities, projects and problems, students learn firsthand how engineers and technicians use math, science, and technology in an engineering problem-solving process to benefit people. The course also addresses concerns about the social and political consequences of technological change.

Robotics Technology: 1 Credit

Grades 10-12

Prerequisites: Successful completion of PLTW Computer Science Essentials

Students will be introduced to various engineering concepts to build a functional robot guided by the FIRST Tech Challenge curriculum. Students will be immersed in the design process and learning various programming languages as well as the components necessary to build a robot. Students will use collaborative skills to develop an innovative solution to a real-world problem. There will be class engineering challenges using the radio-controlled TETRIX robotic system and smart phones equipped with Bluetooth capabilities. Careers in robotics, programming, and engineering will be discussed. Students will also explore various real-world problems and work as a collaborative group to develop an innovative solution to an engineering or environmental challenge facing our society. Students will explore basic Auto-CAD and use these skills to create 3D print prototypes for innovative solution projects.

Trades I: Beginning Woodshop: 1 Credit

Grades 9-11

Prerequisites: None

This course gives students an introduction to the hands-on world of skilled trades. Students will learn important skills in measurement, safety, and basic power tool usage. Students will work to create four finished projects throughout the semester-long course. Beginner Woodshop is the first course in the Skilled Trades course tree. Completion of the Skilled Trades program will lead to industry certifications and skills that will prepare students to immediately enter skilled trade apprenticeship programs after graduating from Center High School.

Trades II: Advanced Woodshop: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Trades I: Beginning Woodshop

This course will engage students with more complex skills in measuring, cutting, and joining wooden materials. Students will learn how to use more advanced math techniques which will allow for more complex designs. Students will also learn finishing skills such as routing, painting, and staining to provide a more professional look to their projects. Completion of the Skilled Trades program will lead to industry certifications and skills that will prepare students to immediately enter skilled trade apprenticeship programs after graduating from Center High School.

Trades III: Woodshop Capstone: 1 Credit

Grades 11-12

Prerequisites: Successful completion of Trades II: Advanced Woodshop and Teacher Recommendation

Woodshop Capstone is the third course in the Woodshop course tree. Students will review skills learned in previous classes before participating in the planning process for a large-scale, individual project. Students will utilize 3D CAD software to create a design. They will then carry that design to an actual product that is created over the course of the semester. Students will complete one project each semester.

Other Electives

Staff Aide

Grades 11-12

Prerequisites: Teacher and Administration Recommendation

A high school student aide supports teachers and staff by helping with classroom tasks, supervising students, and handling administrative duties, essentially acting as an assistant to create a better learning environment, which can involve tutoring peers, grading simple assignments, organizing materials, managing attendance, running errands, or helping with special needs students.

Independent Study

Grades 11-12

Prerequisites: Teacher and Administrator Recommendation

A high school independent study is a flexible, alternative learning path where motivated students pursue specific subjects or in-depth projects with teacher guidance but less direct supervision, allowing them to earn credit for exploring interests not offered in regular classes or to work at their own pace, developing self-discipline and responsibility. It involves creating a customized learning plan, often with a proposal, and can range from self-designed curricula to pre-packaged programs with weekly teacher check-ins, homework, and tests.

Elevate Leadership Development: 1 Credit

Grades 10-12

Prerequisites: Successful completion of Intro to Elevate: Character Ed

Be the spark that ignites positive change in our city by taking part in one of the most impactful national leadership programs in the nation. Through fun, interactive, and engaging experiences focused on 13-character qualities and life skills, you'll learn what it means to be a leader in your own life and act as an agent of social change in the lives of others. By choosing to be an Elevator, you can create a social movement by building long-term, life-changing relationships through being a Teacher-Mentor to elementary-aged students.

Introduction to Elevate: Character Education: 1 Credit

Grade 9

Prerequisites: none

Introduction to Elevate is a highly engaging and interactive learning experience. Students will learn about their passions and how to translate those passions into action to create positive change in the world. To prepare students for such an audacious adventure, they will have a chance to discover the wisdom of their past, the power of their present, and how to create a bold future.

Honors Seminar: No Credit

Grades 11-12

Prerequisites: Library Teacher Recommendation

The course is designed to allow students the opportunity to use a designated class period during the seven-period school day to balance the rigorous coursework required of 3 or more weighted (AP and/or dual credit) classes as designated in the Center High School Course of Study. The hour may also be utilized to work on computer assisted instruction related to class tutorials and ACT Online Preparation.

Off-Campus Real-World Learning Opportunities

Herndon Career Center

The Herndon Career Center is supported by the Consolidated School District No. 2 (Raytown), in cooperation with five other area school districts. The five participating school districts include: Center 58, Grandview C-IV, Hickman Mills C-I, Independence 30, and Lee's Summit R-VII. Within the six districts are eleven high schools: Center, Grandview, Lee's Summit, Lee's Summit North, Lee's Summit West, Raytown, Raytown South, Ruskin, Truman, Van Horn, and William Chrisman. The Herndon Career Center provide students high-quality, in-demand workforce training, college preparation and entrepreneurial programs in a fiscally responsible manner. Herndon supports citizenship and service central to the development of students. Please click on the link below for additional information:

[Herndon Career Center: Home](#)

170700 Advertising Art & Graphic Design I

11-12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building B.

Prerequisite(s): Minimum 2.0 GPA; 90 % attendance record; successful completion of English II and Algebra I with a C or better. Recommended: Introduction to Visual Arts, Graphic Design I & II.

First year curriculum consists of an in-depth study and application of Adobe Creative Suite, specifically Adobe InDesign, Illustrator and Photoshop. This course will prepare students to continue their training and education in the design and print industry. The emphasis is on advertising and business design, creative problem solving and workflow, artistic critiques, print production, branding, and the use of technology in design to develop skills necessary for continuing education. Students will engage in client-connected design and print production utilizing commercial printing equipment. Students receive Adobe Certified Associate Certificate and OSHA-10 training. As such, appropriate footwear and safety standards must be adhered to in the classroom and shop environments.

170700 Advertising Art & Graphic Design II
12 Grade

3.0 Credits 2 Semesters Herndon Career Center Building B.

Prerequisite(s): $\geq$ 90% attendance and a minimum grade of B- in Advertising & Graphic Design I. Students must have earned their Adobe Certified Associate Certificate and obtained their OSHA 10 card.

Second year students will continue to build their foundation by expanding their two-dimensional design skills and advancing their visual communication skills by exploring a variety of design processes and techniques, as well as compositional and aesthetic concepts. Students will follow Adobe Certification Criteria and work towards Adobe Certification. Students in the second year of this program will serve in a management role as they work directly with client relationships and engage in professional opportunities. Second year students will also serve as project managers and lead a team of students in creative client projects.

016711 Animal Health Science I
11-12 Grade

3.0 Credits, 2 Semesters, Kansas City Zoo & Aquarium. Prerequisite(s): Minimum 2.0 GPA; 90 % attendance record; successful completion of English II and Algebra I with a C or better; Biology Grade of C or better.

This hands-on, project-based career exploration course will allow students an opportunity to discover a variety of options in the animal health industry. Students will learn from professionals in the fields of large animals, marine animals, small animals, exotics, wildlife, and animal research. Students will practice soft skills and professionalism both in the classroom and through an earned internship second semester. Classroom location for Animal Health Sciences is at the Kansas City Zoo. This program is eligible for 1-4 credits of dual credit work through Northwest Missouri State University. Students should be prepared to complete and present a comprehensive, year-long passion project. Students must provide their own transportation.

016711 Animal Health Science II
12 Grade

3.0 Credits, 2 Semesters, Kansas City Zoo & Aquarium. 2nd Year Prerequisite:

Students must meet eligibility requirements including 90% attendance at HCC, a cumulative Animal Health Science I grade of 80% or higher, and a positive internship evaluation from first year second semester internship. Students must also desire to be out in industry on an internship setting totaling at least 8 hours per week and take on the role of mentors to the first-year students. Students engaging in second year programming should be prepared to complete and present an advanced, year-long passion project. Students must provide their own transportation.

170301 Auto Collision & Repair Technology I
11-12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building B

Prerequisite(s): Min 2.0 GPA; 90% attendance record; successful completion of English II and Algebra I with a C or better. Recommended: Industrial technology, metalwork, art, and computer skills.

This course is the first year of a two-year program designed to prepare students for entry-level jobs repairing and refinishing damaged collision vehicles. Employment opportunities exist in automotive dealerships, independent repair shops, specialty shops, or fleet operations. Students will learn to identify and locate cosmetic and structural panels used in construction of vehicles using program trainer vehicles. Students will be able to identify and use collision repair tools with

current industry standards and demonstrate the safe use of auto body hand and power tools in shop activities. Students will learn basic mig-welding techniques as used in panel replacement and will learn to demonstrate the ability to set up and operate welding equipment used in the repair of major collision damage. Students will learn industry standard metal straightening techniques used to return damaged panels to factory specifications. Students will be eligible to earn their OSHA-10 safety card and their I-CAR Pro Level i Body Non-structural Certification during the first year of this program. Appropriate dress and safety standards are always required within the shop environment.

170301 Auto Collision & Repair Technology II
12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building B

Prerequisite(s): $\geq 90\%$ attendance and $\geq B-$ or better in Auto Collision & Repair Technology I; ICAR badges and OSHA 10 card.

This course is the second year of a two-year program designed to further develop skills for entry-level or advanced positions in the automotive collision industry. Students will expand their knowledge gained in year one by working on client projects and learning appropriate mechanical services necessary in the field. Second-year content includes color theory, color matching techniques, and the safe set up and use of HVLP paint equipment. Students will practice industry techniques related to the refinish process, including basecoat and clearcoat application, mixing multi-stage finishes, and identifying and addressing refinishing defects. Students will be eligible to earn the I-CAR Pro Level 1 Refinish Technician certification.

997001 Behavioral Health I
11-12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building C.

Prerequisite(s): Min 2.0 GPA; 90% attendance record; successful completion of English II and Algebra I with a C or better

The Behavioral Health program supports students interested in careers in the behavioral health field. It provides a comprehensive understanding of fundamental concepts and practices under the umbrellas of Psychology and Sociology to equip students with skills to support individuals facing behavioral health challenges, promote mental well-being, and improve community mental health. Students will engage in lecture-style, conversational learning, and demonstrate skills through case studies, roleplays, and activities such as projects and presentations. Entry-level roles include direct service professional or registered behavior technician, while long-term career paths may include counselors, social workers, psychiatrists, or behavior analysts. Students can earn and complete OSHA-10, Mental Health First Aid, and BLS Heartsaver Certification.

997001 Behavioral Health II
12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building C.

Prerequisite: 90% attendance and a B- or better in Behavioral Health I

The second-year curriculum focuses on developing more soft skills for the behavioral health field, crisis management, job shadowing, and internships. Students can work on curriculum to eventually earn their Registered Behavior Technician certificate. Second year enrollment may be dependent upon job shadowing and off-site learning opportunities. Students with low professional and

participation grades according to the rubric may be ineligible. Students must provide their own transportation to off-site locations.

997001 Business Innovation & Creation I
11-12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building C.

Prerequisite(s): Min 2.0 GPA; 90% attendance record; successful completion of English II and Algebra I with a C or better. Recommendations: Students need a desire to be in an environment that encourages teamwork in a project-based real-world environment.

This course is designed for students who have an interest in the business innovation and creation field. This career education course will allow students an opportunity to creatively solve problems for new, existing, and expanding markets. Students will have the opportunity to learn from professionals in the field of entrepreneurship, patent development, marketing, and economic development. This course is a hands-on, project-based exploration opportunity for students. Students should be prepared to work with professionals on real-world company-based projects. Students meet on campus or at business locations throughout the first semester while gaining skills to earn an internship for the second semester. Student transportation is required. This program is eligible for 1-4 credits of dual credit work through Northwest Missouri State University.

997001 Business Innovation & Creation II
12 Grade
3.0 Credits, 2 Semesters, Herndon Career Center - Building C

2nd Year Prerequisites: Students must meet eligibility requirements including 90% attendance at HCC, cumulative HCC grade of 80% or higher, successful completion of year 1 internship, positive internship evaluations and their own personal transportation. Students must also desire to be out in industry 4 days a week in an internship setting.

171001 Construction Technology I
11-12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building A.

Prerequisite(s): Minimum 2.0 GPA; 90% attendance record; successful completion of English II and Algebra I with a C or better. Recommended: Industrial technology courses in wood, metal, electricity, and drafting.

This course provides instruction in Blueprint Reading, Basic Concrete Finishing, Structural Framing, Electrical, Plumbing, Interior Finishing, Roofing, and Heavy Equipment operation. Safety is emphasized through a 10-hour OSHA training program and proper use of hand and power tools. Students develop technical skills and workplace readiness through classroom instruction and hands-on projects. Using the Carpenter Millwright curriculum, students can eliminate some entry-level training and start at a higher pay rate. Those seeking more in-depth study may return for a second year if space is available.

171001 Construction Technology II
12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building A.

Prerequisite(s): $\geq 93\%$ attendance and $\geq$ B- or better Construction Technology I, IRC, OSHA 10 Certification.

This course is designed to prepare students to enter the construction career field. The second year is a higher-level process of construction and will require more in-depth knowledge of the units

covered in Construction Technology I. Students will be expected to do independent research of jobs and how trades work together effectively to complete a project. Students will work on personal skills of how to manage a job and the work of others, including the estimation of costs and labor. Students will continue learning basic skills in all areas of construction along with construction math skills, problem solving skills, material estimation, labor calculations, goal setting, and business development. Students will acquire knowledge and develop technical skills through classroom instruction as well as planning and constructing related projects. Students will complete the Carpenters Level 3 certification through this program, which could result in a higher rate of pay if they join a Carpenters Union Contractor. Students completing two years of Construction Technology are eligible for up to a 5% pay increase.

096900 Cosmetology

12 Grade

8.0 Credits, 2 Semesters, Herndon Career Center - Building A. Extended School Day Tuesday, Wednesday, Thursday until 4:15 pm.

Prerequisite(s): Min. 2.0 GPA; 90% attendance record; Biology or Chemistry with a C or better; successful completion of English II and Algebra I with a C or better. Applicants must have completed all high school graduation requirements (except Practical Arts electives and English IV) by the beginning of their senior year. Recommended: Art, anatomy and physiology, business management, and communications.

The Cosmetology program at Herndon Career Center prepares students for the Missouri State Board of Licensing exam and employment as a cosmetologist. This 1,220-hour, full-day program covers hair and scalp properties, haircutting techniques, chemical applications, skin care, makeup, nail care, hygiene, business ethics, safety, sanitation, salesmanship, communication skills, and state laws. Students must work well in teams, wear approved uniforms daily, and provide transportation home due to extended hours (7:40–2:20 on Monday and Friday; 7:40–4:15 Tuesday through Thursday). Graduates are eligible for the Missouri State Board exam and earn certifications including Milady Rise, Barbicide, Barbicide Health and Wellness, and OSHA-10 for general industry. Fees & Expectations: Students must purchase a salon kit costing approximately \$1,200, which includes tools for the State Board of Cosmetology exam and a foundation kit for entering the profession. Optional licensing opportunities may require additional fees throughout the year. While a social security number is not needed to enroll, it is required for the state board exam. A \$100 deposit is due by May 15 for selected students, and once ordered, kits are non-returnable, making students responsible for the full cost.

096815 Culinary Arts I

11-12 Grade

3.0 Credits 2 Semesters Herndon Career Center Building C

Prerequisite(s): Minimum 2.0 GPA; 90% attendance record; successful completion of English II and Algebra I with a C or better. Food Prep I and Food Prep II.

Recommended: Business Fundamentals

The capstone classes offered at Herndon Career Center are under the umbrella of the National Restaurant Association called ProStart. ProStart is a two-year hospitality program that will develop the aspiring young leader with the restaurant skills that will lead them into college and their career. ProStart culinary classes offer a block of time that will teach students the foundation of the restaurant industry where they will apply cooking methods while learning both front of the house restaurant standards and back of the house operations. Students will do so through running a student-run restaurant called CINDER. Students will learn safety and sanitation, basic and advanced cooking methods. Students will also earn their ServeSafe certification for food safety. Students

will demonstrate ability to calculate food and recipe development throughout their two years in the program.

Fees & Expectations: Students will order a uniform to be worn daily during class. Students may occasionally be required to work after regular school hours to participate in catered events and ProStart activities. Student fees will be approximately \$150 to cover uniforms.

096815 Culinary Arts II
12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center – Cinder

Prerequisite(s): Completion of Culinary Arts I with B- or better and 90% attendance

Recommended: Foods and nutrition courses, health courses, business courses

The capstone classes offered at Herndon Career Center are under the umbrella of the National Restaurant Association called ProStart. ProStart is a two-year hospitality program that will develop the aspiring young leader with the restaurant skills that will lead them into college and their career. ProStart culinary classes offer a block of time that will teach students the foundation of the restaurant industry where they will apply and master advanced cooking methods while applying management goals for both front of the house restaurant standards and back of the house operations.

The successful ProStart student will graduate with two national certifications. One being in safety and sanitation, and the other is a Certificate of Achievement. Students who earn their ProStart COA can be eligible for credits at post-secondary institutions including Johnson County Community College. Successful students are eligible to earn up to 10 hours of credit in the Johnson County Community College Culinary Arts program.

Fees & Expectations: Students will order a uniform to be worn daily during class. Students may occasionally be required to work after regular school hours in order to participate in catered events and ProStart activities. Student fees will be approximately \$150 to cover uniforms. 2nd Year Culinary Arts Special Topics: Students must meet the 90% minimum attendance rate and B-average to return for the 2nd year of curriculum.

171200 Diesel, Industrial & Agricultural Mechanics I
Grade 11

Prerequisite: Min 2.0 GPA; 90% attendance record; reading, writing, and math at 10th grade level. Recommended: Industrial Technology course.

Course Description: This course is the first year of a two-year program preparing students as entry-level technicians for heavy construction equipment, trucks, and industrial plant vehicles. Students will practice maintaining, servicing, and repairing engines, power trains, controls, and other components on heavy trucks, earth-moving equipment, and stationary power plants. Many graduates enter the diesel industry or post-secondary internships in diesel mechanics. Key topics include oils and fuels, basic engines, HVAC, electronics, hydraulics, welding, air brakes, pneumatic systems, and transmissions, with strong industry involvement throughout the course. Students will be eligible to earn their ASE Medium/Heavy Truck certification, ASE 609 certification, and their OSHA-10-hour safety card.

171200 Diesel, Industrial & Agricultural Mechanics II
Grade 12

Prerequisite: Successful completion of Diesel, Industrial, & Agricultural Mechanics I with a grade of 80% or better, 90% attendance and instructor recommendation.

Course Description: This course is the second year of a two-year program preparing students as entry-level technicians for heavy construction equipment, trucks, and stationary power plants. Students will practice maintaining, servicing, and repairing engines, power trains, controls, and other components on heavy trucks, earth-moving equipment, and lift trucks. Many graduates enter the diesel industry or post-secondary internships in diesel mechanics. With strong industry involvement, the curriculum covers topics such as oils and fuels, basic engines, HVAC, electronics, hydraulics, welding, air brakes, pneumatic systems, and transmissions. Students will be eligible to earn their ASE Medium/Heavy Truck certification, ASE 609 certification, and their OSHA-10-hour safety card.

096842 Education Exploration I
11-12 Grade

3.0 Credits, 2 Semesters, Spring Valley Elementary

This course is designed for students who have an interest in learning about future careers in teaching and education. Students will have the opportunity to observe pre-K through secondary instruction, collaborate with educators, lead classroom instruction, and explore post-secondary opportunities. The program is largely centered on learning about classroom teaching, including time devoted to field trips and guest speakers to learn about varying careers within education. Students should be prepared to complete and present a comprehensive, year-long passion project. First year students may earn up to six (6) college credits through Northwest Missouri State University. Student transportation is required.

096842 Education Exploration II
12 Grade

3.0 Credits, 2 Semesters, Spring Valley Elementary

2nd Year Prerequisites: Students must meet eligibility requirements including: 90% attendance at HCC, a cumulative HCC grade of B- or higher, and a positive internship evaluation rating from year 1. Students must also have a desire to be on a student-teaching internship 4 days a week and complete an advanced, year-long, passion project.

Second year Education Exploration students will have the opportunity to complete a year-long student teaching internship 4 days per week and attend a teaching seminar 1 day per week. During the second-year experience, students will collaborate with educators, lead classroom instruction, and explore post-secondary opportunities. Second year students may earn up to six (6) college credits through Northwest Missouri State University. Student transportation is required.

070906 Foundations of Nursing I 11-12 Grade
3.0 Credits, 2 Semesters, Herndon Career Center - Building C

Prerequisite(s): Minimum 2.0 GPA; 90% attendance record; Biology, Chemistry or Principles of Biomedical Science with a C or better; English II and Algebra 1 with C or better. Recommended: Anatomy and Physiology, Intro to Health Careers, Chemistry, Psychology

This one-year program is designed for students to explore a career in Nursing and related health careers. This program includes classroom and hands-on/clinical experiences. Classroom instruction includes anatomy, physiology, medical terminology, and entry level nursing topics. Classroom instruction also includes American Heart Association CPR and First Aid certification. Students will learn and practice clinical skills in a controlled simulation lab. Students will then spend 100 hours at various long-term care facilities perfecting their clinical skills. Students will

have opportunities to observe other health care professionals. Students who successfully complete the program will meet the requirements to take the final examination to become a Certified Nurse Assistant (CNA). Fees & Expectations: Student transportation is required to the clinical sites. A background check will be required for clinical experiences as well as a TB skin test, and a physician statement acknowledging the student can physically handle the required tasks to obtain the CNA. Students must have a social security number in order to get the background screening (Family Care Safety Registry) and meet the clinical site requirements. Students may need to provide proof of vaccination against COVID-19 or an exemption to participate in clinicals. Uniforms will be required for clinical experiences and paid through student fees. Student fees are approximately \$175 (for equipment, scrubs, etc.).

070906 Foundations of Nursing II

12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building C

Prerequisite(s): 90% attendance, A- or better in Foundations of Nursing I, CNA license, BLS Heartsaver, OSHA 10 Healthcare card

Second year enrollment may be dependent upon job shadowing and off-site learning opportunities. Students with low professional and participation grades according to the rubric may be ineligible. We have a max of 2 second year opportunities per teacher per session. Students must provide their own transportation to off-site locations. This one-year program compliments Foundations of Nursing I. The students will also be team leaders/mentors for the 1st year students. This includes, but not limited to teaching new skills, mentoring and evaluating students in the classroom lab and at clinical.

These students will also experience different shadowing opportunities each week between the middle of September and the end of March. Some sites include well-student checkups in Raytown School District with Oracle; multiple weeks shadowing different departments at the Jackson County Health Department, shadowing a chiropractor, shadowing multiple school nurses in the Raytown district & University Health. Other sites may be added later in the semester. Students will be rotated through all the different locations. Student transportation is required. Students will be required to meet the specific requirements of each health care site to participate in off campus learning opportunities.

170100 HVAC/Industrial Maintenance I

11-12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building A

Prerequisite(s): Min 2.0 GPA; 90% attendance record; successful completion of English II and Algebra I with a C or better. Recommended: Industrial Technology class

The HVAC/Industrial Maintenance Program provides students with the knowledge and skills necessary to assemble, install, troubleshoot, repair, and modify machinery and systems that are mechanically or electronically controlled in residential, commercial, and manufacturing environments. This program includes training in heating, venting, air conditioning, refrigeration, air distribution, plumbing, pipe fitting, and electrical systems. Classroom instruction combined with hands-on experience emphasizes applying principles using actual industry equipment in real-world applications. Students completing the first year of this program will be eligible to earn their OSHA-10 card and the EPA-608 Refrigerant Handling Certification. Shop safety is paramount and requires industry-appropriate clothing, including a long-sleeved cotton work shirt, leather work boots, leather gloves, and industrial work pants (jeans with no holes/coveralls).

170100 HVAC/Industrial Maintenance II
12 Grade
3.0 Credits, 2 Semesters, Herndon Career Center - Building A

Prerequisite(s): $\geq 90\%$ attendance and $\geq$ B- or better HVAC/Industrial Maintenance I, EPA 608 certification, and OSHA 10 card.

Second year students will continue to expand their knowledge and skills in the HVAC/Industrial Maintenance area. Students' curriculum will be determined in part by their individual career plans after high school and based on their individual skills. Students will develop their problem-solving and leadership skills through projects. Students demonstrating competency and advanced skills may have the opportunity to pursue an internship but will be responsible for their own transportation.

170613 Law Enforcement Science I
11-12 Grade
3.0 Credits, 2 Semesters, Herndon Career Center - Building C

Prerequisite(s): Min 2.0 GPA; 90% attendance record, successful completion of English II and Algebra I with a C or better

This year-long course offers students a comprehensive introduction to law enforcement and police science, preparing them for further education and potential careers in criminal justice and related fields. Students will explore the historical development of law enforcement, examine the structure of the criminal justice system, and investigate a variety of career paths, including policing, corrections, dispatch, and forensic sciences. Through hands-on learning and critical discussions, students will analyze real-world incidents, including police interactions, crime scenes, and case studies, using videos, photographs, and reports.

Emphasis will be placed on developing leadership competencies and ethical decision-making skills, while also exploring the societal factors that influence law enforcement practices and public perception. Students can earn industry-recognized certifications in areas such as CPR/First Aid, FEMA ICS/NIMS, OSHA10, dispatch procedures, and other core competencies essential to public safety careers. This course is eligible for up to six hours of dual credit through Missouri State University and six hours through Metropolitan Community College (MCC).

Fees & Expectations: Students may be expected to purchase a pair of khaki style pants and black leather tennis shoes or boots.

170613 Law Enforcement Science II
12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building C

Prerequisite(s): Completion of Law Enforcement/Police Science I with a B- or better, 90% attendance during first year of the course; CPR/First Aid, FEMA ICS/NIMS, OSHA 10 certifications

This course is designed for students ready to expand their skills through leadership, communication, and professional experiences. Building on prior knowledge, students will take on a more active role in class discussions, scenario facilitation, and peer mentoring. Emphasis is placed on developing strong leadership, teamwork, and public speaking skills essential for careers in public safety. Students will engage in deeper analysis of law enforcement policies, current events, and ethical dilemmas while honing their ability to communicate clearly and think critically under pressure.

Throughout the year, students will participate in job shadowing opportunities, professional interviews, and field experiences with local law enforcement agencies, corrections, dispatch centers, and other criminal justice professionals. Select students may also qualify for internships, providing valuable, hands-on exposure to the field. This course prepares students for post-secondary programs and employment in criminal justice by refining their professional readiness, enhancing their understanding of community-oriented policing, and reinforcing the importance of integrity, accountability, and service in public safety roles. Fees & Expectations: Students may be expected to purchase a pair of khaki style pants.

Pharmacy Tech I Grade 12

3.0 Credits, 2 Semesters, Herndon Career Center - Building C

Prerequisite(s): Min 2.0 GPA; 90% attendance record, successful completion of English II, Algebra I, Biology I or Chemistry I with a C or better

This one-year program is designed to introduce students to the many careers available in the pharmaceutical industry. This program will learn common medications, scientific terminology, how different drugs work in the body, and the different types of pharmacies that are available to work in. Students will practice professionalism and communication utilizing role playing scenarios as they prepare for job shadowing and clinical experience opportunities. This program will teach standards consistent with the national Pharmacy Technician Board Certification (PTCB) guidelines. A combination of active lecturing, guest speakers, field trips and labs will be utilized. Students will earn the OSHA10 Healthcare certification and work towards becoming a nationally certified pharmaceutical technician.

070923 Introduction to Physical Therapy & Sports Medicine I 11-12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building C

Prerequisite(s): Minimum 2.0 GPA; 90% attendance record; Algebra I, Biology I or Chemistry I, English II with a C or better. Recommended: Anatomy and Physiology, Intro to Health Careers, Chemistry, Psychology

Prepare for a rewarding career as a valued member of the physical therapy and sports medicine team while learning all about the human body, specific injuries and disorders, and the way rehab professionals treat these disorders. Students will explore the history of various healthcare professions and the similarities and differences between physical therapy, athletic training, occupational therapy, and a variety of kinesiology and sports medicine careers. Students will learn how to communicate effectively using proper medical terminology with health care professionals and patients. Students will learn proper body mechanics and how to safely move patients. Students will come to understand how to help patients walk with assistive devices like walkers, crutches, and canes. Students will learn about functional anatomy, injury recognition and prevention, exercise programming, and neurological disorders. Students will understand common physical therapy techniques, including the use of various modalities, and their effects on the body. By the time students finish this course, they will have gained valuable knowledge and be well on the way to becoming an important member of the physical therapy and sports medicine team. Students in this course will have the opportunity to earn their OSHA 10-Healthcare certification, American Heart Association BLS certification, and dual credit for Intro to Kinesiology.

070923 Introduction to Physical Therapy & Sports Medicine II 12 Grade

3.0 Credits 2 Semesters Herndon Career Center Building C Prerequisite(s): A- and 90% attendance or above in Physical therapy and Sports Medicine I Second year enrollment may be dependent upon job shadowing and off-site learning opportunities. Students with low professional and participation grades according to the rubric may be ineligible. We have a max of 2 second year opportunities per teacher per session. Students must provide their own transportation to off-site locations.

This course is designed for students to further develop the knowledge and skills which will best prepare them for the future in the fields of physical therapy, sports medicine, and personal training. Students will take a more in-depth look at the anatomy of the human body and develop a deeper understanding as to how they can assess and respond to patients/clients to help them achieve their health or fitness goals. Students will gain additional exposure to hands-on learning, enhance patient care and employability skills, provide mentorship to peers, and participate in ongoing career exploration. Students will have the opportunity to renew their BLS certification. Upon completing this course, students will be well on their way to becoming an important member of the physical therapy and sports medicine team! Successful completion of the second-year curriculum will also allow students to sit for the National Academy of Sports Medicine Certified Personal Trainer certification exam (NASM-CPT) with the opportunity to begin work as a personal trainer when passed.

Fees & Expectations: Students will be expected to provide their own transportation to and from any individual site visits. Professional dress (as indicated by industry site) with closed-toe shoes is expected during industry interactions. Clinical sites may require students to possess a background check, updated vaccinations, TB skin test, drug test, and a physician's statement acknowledging the student can physically handle the required tasks.

172306 Welding & Metal Fabrication I 11-12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building A

Prerequisite(s): Min 2.0 GPA; 90% attendance record, successful completion of English II and Algebra I with a C or better. Recommended: Students should take basic drafting and metals classes if they are available at their high school.

This course is the first year of a two-year program that prepares students to meet the American Welding Society's entry-level employment requirements or pursue post-secondary training. Laboratory work includes basic flame cutting, oxy-fuel welding and shielded metal arc welding of mild steels. Classroom instruction covers welding theory, terminology, techniques, measuring, mathematics and beginning blueprint reading. Students have the opportunity to earn their 10-hour OSHA certification and AWS SENSE certification. Students who meet qualifications as outlined and specific to welding processes have the opportunity to test for AWS certification. Students who complete Welding & Metal Fabrication I and II may be eligible for up to 16 hours of articulated credit through Ozark Technical Community College. Fees & Expectations: Students must supply their own protective cotton clothing (a long-sleeved work shirt, welding cap, above-the-ankle leather work boots, and jeans or coveralls in good condition). Students who wear glasses are recommended to purchase prescription safety glasses. Students are responsible to replace any equipment initially supplied by the school, such as gloves, helmet, goggles, pliers, etc. Safety, work ethic, employability skills, quality of work and pride in workmanship are always emphasized.

172306 Welding & Metal Fabrication II 12 Grade

3.0 Credits, 2 Semesters, Herndon Career Center - Building A.

Prerequisite(s): ≥ 90% attendance and ≥ B- or better Welding & Metal Fabrication I, OSHA 10 certification

Second year students will continue to expand their knowledge and skills in the Welding & Fabrication area. Students' curriculum will be determined in part by their individual career plans after high school and based on their individual skills. Students will develop their problem-solving and leadership skills through projects. Students demonstrating competency and advanced skills may have the opportunity to pursue an internship.

Early College Metropolitan Community College

MCC offers a variety of Early College Academies for high-achieving, motivated high school students. The academies provide a faster, more affordable path to a certificate or degree. Each MCC campus offers an unique Early College Academy experience. Please click on the link below for additional information:

[Early College Academies for HS Students](#)

HT7215 Missouri Innovation Campus (MIC) Program

Crossing the stage and receiving a diploma is an important milestone for a high-school senior. Combine this with an innovative program that accelerates the time it takes to earn a college degree in addition to working in a high-demand internship, and you are left with a well-equipped, high school graduate. As a result of participating in one of the Missouri Innovation Campus (MIC) programs, students will be on track to earn a bachelor's degree just two years after graduating from high school.

The MIC is a progressive initiative by the University of Central Missouri, Metropolitan Community College, the Lee's Summit R-7 School District, community organizations and business partners. This program is designed to revolutionize the way students learn and work, while bridging the gap between skills and workforce demands. The path for students to be admitted into the MIC program will encompass numerous steps. It starts with applying to Summit Technology Academy (For *Engineering*, apply for Digital Electronics & Robotic Automation; for *Cyber*, apply for Network Operations & Network Security; for *Data* or *Computer Science*, apply for Java & Python). Each step of the student's plan towards a baccalaureate degree will include academic support and internship support from the staff of MIC. The students' industry immersion will be structured towards a specific career field that is best matched with each student. MIC students must meet more rigorous standards. The details below will give students a glimpse into each of the six MIC programs.

Early College Academy

Early College Academy is a program offered on our [MCC-Penn Valley](#) campus and is a partnership with Kansas City Public Schools and Guadalupe Centers High School.

The program allows students to spend most of their junior and senior years on the MCC-Penn Valley campus instead of high school classrooms. Those who complete the Early College Academy also earn an Associate in Arts Degree from MCC after graduating from high school.

[Kansas City Public Schools Early College Academy](#)

CMA -University of Central Missouri Nursing

Eligible Juniors can enroll in the University of Central Missouri's Clinical Medical Assistant with Externship certificate program and launch a new career in the high demand, rewarding healthcare field. This program prepares students to assist physicians by performing duties related to clinical responsibilities in medical offices. You will learn to prepare patients for examination and

treatment, conduct routine laboratory procedures and diagnostic testing as well as the technical aspects of phlebotomy (blood collection) and the cardiac life cycle. Upon successful completion of the program, students are eligible to sit for the National Health Career Association Certified Medical Assistant examination. Through this program, students earn an industry-recognized certificate and continuing education units which may not be applied to a degree program and are not eligible for federal financial aid.

PrFY-40010 Pathway to Tech -Cerner

The Cerner Pathways to Technology Program is a Kansas City-based educational initiative, in collaboration with PREP-KC and local school districts, that offers urban high school students a head start on technology careers through coursework, dual college credit, and internships.

Program Details

- Objective: To provide high school students with the computer science skills needed to launch a technology career and prepare them for post-secondary education.
- Structure: The program typically runs for a full year. The first semester involves classroom instruction and earning a micro-credential through Google that is dual credit eligible. The second semester places students in internships alongside professionals at Cerner (now Oracle Health) or other regional businesses, working on real-world projects.
- Partnerships: The program was launched in 2018 by PREP-KC in partnership with Cerner and several local school districts (including Center, Grandview, Hickman Mills, and Kansas City Public Schools).

PrFY-40020 Pathway to Design -Ruskin

Students in grades 10-12 will have the opportunity to apply to be a part of our Pathways to Design Academy, offered in partnership with Prep-KC, Center School District, and Grandview School District. This program is for students interested in marketing, graphic design, or even journalism. This will be a half day program, and students will attend class at an area design firm.

SUMMIT TECH ACADEMY

Summit Tech Academy (STA) is available to Center School District 11th and 12th graders who meet specific attendance and academic qualifications. STA offers advanced capstone courses for high wage, high demand career fields to best prepare students for career opportunities beyond high school. STA coursework is rigorous and aligned to industry standards as well as post-secondary curriculum so that students are ready for whatever is next for them. STA capstone courses challenge students to achieve their best. Please click on the link below for additional information:

[Summit Technology Academy: Home](#)

PrFY-40050 Aerospace Academy –ST

Have you ever wanted to design, maintain, or pilot an airplane or rocket? Are you interested in a deeper understanding of what it takes to work in the Aviation and Aerospace fields? The Aerospace Academy Capstone provides advanced level avionics/aviation/aerospace pathways. This program represents a collaboration between STA, the City of Lee's Summit, the Lee's Summit Economic Development Council, and the Lee's Summit Municipal Airport and includes potential lab opportunities for students at the airport. Students will learn cutting-edge curriculum developed by subject matter experts in aerospace/aviation including acquiring learning targets for a FAA Remote Pilot certification, career exploration for the seven aerospace workforce pathways, hands-on

applied learning experiences at the Lee's Summit airport utilizing industry standard equipment, and field experience within one or more of the seven aerospace pathways.

PrFY-40060 Digital Media Technology –ST

Welcome to the professional, industry-aligned experience that is Digital Media Technology (DMT) at Summit Technology Academy. In DMT, we embrace a personalized learning approach that empowers you to grow your audio/video technology skills. The DMT program aligns your education with the real-world practices of the media and entertainment industry.

PrFY-40070 Professional Nursing -ST*

This course is designed to prepare high school senior students, who have identified nursing as a clear career goal, for a collegiate registered nursing program. Students will learn through classroom instruction, practice in a real-world clinical skills lab and gain real-time experiences about nursing through community health and acute care shadowing opportunities. Major units of study include Fundamentals of Nursing; Medical Math; Medical Language and include certifications in CPR/AED; First Aid and OSHA10. The STA Professional Nursing Course will introduce students to the roles and functions of a future R.N. to include: the nursing process, nursing documentation, professional communication skills, medical ethics and NCLEX-RN style assessment questions. Students will learn and use APA style in the course. Dual college credit is available. 2nd semester includes a Shadowing experience OR a Paid Internship experience.

070927 Allied Health

This year-long program is for juniors or seniors interested in learning more about Allied Health careers, or who would like to enter college healthcare programs after graduation. Students will be engaged in learning medical terminology, and in projects related to Physical Therapy, Radiology, Respiratory Therapy, Dentistry, Occupational Therapy, EMT, Surgical Technology, Chiropractics, Athletic Training, Laboratory, Pharmacology, and other allied health careers. This program involves developing personal resumes and allows internship and externship opportunities. In addition, students gain industry credentials such as Basic Life Saver CPR training, OSHA 10 Healthcare, and HIPAA training.

070414 PLTW Medical Interventions and PLTW Biomedical Innovation

This is a year-long course comprised of two related semester courses.

070413 Fall semester: PLTW Medical Interventions™ Students investigate the variety of interventions involved in the prevention, diagnosis and treatment of disease as they follow the lives of a fictitious family. Students conduct experiments while exploring how to prevent and fight infection, how to screen and evaluate the code in human DNA, how to prevent, diagnose and treat cancer, and how to prevail when the organs of the body begin to fail. Students are exposed to a wide range of interventions related to immunology, surgery, genetics, pharmacology, medical devices, and diagnostics. Students study real world medical problems through laboratory experiences. A background check and TB test are necessary for hospital lab placements.

070414 Spring semester: PLTW Biomedical Innovation™

In this capstone course students design and conduct experiments related to a series of Biomedical science problems including Emergency Medicine, Human Anatomy and Physiology, Environmental Science, Molecular Biology, Forensic Science, and Laboratory Research. Students may work with a

mentor or advisor from a university, hospital, or physician's office, as they complete a Team Research Project of their own design. Students submit their Team Research Project along with other BI students in the metropolitan area to a panel of medical professionals. Scholarships are awarded to top winners. Students completing all four PLTW Biomedical courses receive an STA/PLTW embroidered white coat at a white coat ceremony that recognizes them for completing this 4-year program. Students completing all four PLTW Biomedical courses (PBS, HBS, MI, BI) participate in a special White Coat Ceremony at the end of the year.

172803 Firefighter Academy (Senior Year Only)

Do you have career aspirations related to Firefighting and first responding? The Firefighter Academy capstone prepares students to become certified as a Firefighter while completing training in areas like fire suppression, search and rescue and basic first aid. Students will be immersed in the Lee's Summit Fire Department fire training with a certified LSFD Firefighter instructor through drills in the operation of fire hoses for suppressing car and structure fires, extricating victims from car accidents, a burn tower, and learning how to provide emergency first aid to patients. Students will have the opportunity to earn national IFSTA Firefighter I & II certifications that are required for firefighters. Students must provide their own transportation for off-campus field/skill training experiences at firefighting training centers in and near Lee's Summit.

HP7212 Hospitality, Tourism & Recreation Management I & II

When you plan activities, do you naturally consider the participants' experience, ensuring every detail is just right? If so, a career in Hospitality, Tourism, and Recreation Management could be a good fit for you. Hospitality, Tourism and Recreation is one of the fastest growing industries in the world which includes recreational and corporate travel coordinators, meeting, convention and event planners, entertainment and fitness directors, marketing and sales managers, and more. This Capstone Course meets at Paradise Park. Students will need to provide transportation to job shadowing and internship opportunities throughout the year.

034320 International Studies Academy

SISA/GPS is not your typical course; it's a thrilling journey that propels you into the global arena of intercultural communication. Imagine learning through direct experiences across the world, engaging with diverse perspectives in an open-minded, project-based environment. This is a place where individual responsibility, independence, and flexibility are your guiding stars.

HT7226 Teacher Educator Academy

This year-long class is designed for students who are seriously considering the elementary or secondary teaching profession or corporate educator. The course offers students the opportunity to put theory into action through classroom work and the practicum. Students will develop skills and professionalism needed to succeed as an educator as they work directly with students/adults in the practicum. Each student is assigned to a district school within the high school attendance boundaries or to a corporate education department. A blended instructional model of classroom and online learning is used to deliver instruction and to provide opportunities for students to develop their beliefs and philosophy of education. Students will participate in [Educators Rising](#) as part of the course requirements.

HP7233 Environmental Studies (Fall Course) and Spring Course

Course Features:

- **Learn in the Outdoors:** Direct, hands-on scientific investigations occur in the outdoor lab space at Paradise Park Campus, which includes ponds, a greenhouse, walking trails, and native plants and animals. Develop and apply field research techniques and skills to student & class-driven questions.
- **Missouri Ecosystem Focus:** Centered on the unique ecosystems of Missouri, offering a region-specific, place-based learning approach to environmental studies.
- **Animal and Plant Biotechnology:** Provides indoor lab experience in industry-aligned applications of biotechnology related to plant and animal agriculture.
- **Student-Led Research:** Pursue independent, college-level scientific research projects, fostering critical thinking and problem-solving and deep diving into student's specific interest areas.
- **Community Conservation Leadership:** Advocate for the environment and develop a holistic understanding of environmental issues and their impacts through ecological, cultural, & economic perspectives. In addition, help learn how to care for our animal ambassadors in our animal habitat room.
- **Interdisciplinary Collaboration from Diverse Science Teams:** Utilization of chemistry, biology, statistics, and other fields helps students tackle complex real-world problems & projects in partnership with industry professionals.
- **National FFA Organization:** Intra-curricular student organization for students interested in environmental studies that prepares its members for premier leadership, personal growth, and career success.

HT7206 Business, Finance, & Data Analytics

This course encompasses the management of money at the personal, corporate and public levels. Students learn the big picture of business and can prepare for careers ranging from financial adviser to investment banker.

HT7218 Network Operations

Development, Security, and Operations (DevSecOps) is a deep dive into the foundations of network operations by using the lens of security to tie it all together. Hands-on and simulation-based activities in this course assist with implementing network operations with software development and cyber security concepts. Students will see how culture, automation, and platform design integrates security as a shared responsibility throughout the entire IT lifecycle. In this course, you will learn about the OSI Model and how that model allows IT to function across Software Development, Cybersecurity and Network Operations. Specifically, you will learn the principles and structure of IP addressing, LAN and WAN specifications, and network management. This course encompasses additional college classes (6 college credits) to begin preparing students for the Cisco Certified Network Associate certification exam. Learn information the tech industry needs for high-demand, high-wage tech careers. Students interested in the MIC Cybersecurity early bachelor's degree program must enroll in this course and Advanced Network and Cyber Concepts.

This is a semester-long offering to be paired with another course from the Computer Science Pathway. Please be mindful of prerequisites.

This is a semester-long offer that must be paired with [Network Operations](#) from the Computer Science Pathway. Please be mindful of prerequisites.

HT7208 Cyber Security

Get the preparation needed for the Cybersecurity workforce through hands-on experience into network security protection, as well as an understanding of the types of attacks used against networks. This course will cover security policies such as risk management, data privacy, employee management, device management, network management, and business continuity. Students will develop an understanding of physical, perimeter, network, host, application and data defenses. This course helps the student prepare for the CompTIA Security+ certification exam.

HT7228 Cyber Operations

Uncovering cybercrime, cyber espionage, and other networking threats are just some of the exciting cyber security jobs spanning across every industry. Learn the skills to join this fast-growing field and take advantage of the opportunities found in security operation centers. In this course you will learn security concepts, security monitoring, host-based analysis, network intrusion analysis, and security policies procedures. This course aligns with the National Initiative for Cybersecurity Education (NICE) Cybersecurity Workforce Framework to support consistent communication language for cybersecurity education, training, and workforce development. This course covers the information required for Test Out, Ethical Hacker Pro and/or Certified Ethical Hacker (CEH) certification exams.

HT7222 Software Development-Python

Become empowered to program by learning the critical concepts of computer programming through the Python language. Learn Python content currently taught in college curriculum and in industry. Topics include basic computer organization and systems, data representation, algorithms, selections, loops, functions, classes, objects, elementary programming, applications, strings and text I/O, inheritance, lists, dictionaries, scripting, and various Python libraries. Students interested in the MIC Computer Science: Software Development or Software Engineering early bachelor's degree program must enroll in this course and Software Development - Java. This is a semester-long offering to be paired with another course from the Computer Science Pathway. Please be mindful of prerequisites.

HT7223 Software Development Java

Introducing a rigorous Java course tailored for high school seniors, offering a deep dive into advanced programming techniques and team collaboration. This course goes beyond standard curriculum, emphasizing a blend of technical proficiency and essential soft skills.

HT7229 Software Development AI and Data Engineering

Do you ever wonder why ads "just so happen" to pop up for you? Data doesn't lie, and it is being used to make decisions and guide next steps daily. Uncover the mystery behind the data. Students will use the Python programming language to learn the basics of Data Analytics as well as give them hands-on experience working with database tools available. This course, designed with our advanced learners in mind, will continue their understanding and implementation of programming fundamentals and concepts acquired through previous programming courses. We will explore python libraries specific to the field of data manipulation. By the end of the semester, students will understand how Machine Learning fits into Artificial Intelligence and use different methods of Machine Learning including Neural Networks. This is a semester-long offering to be paired with another course from the Computer Science Pathway. Please be mindful of prerequisites.

HT7230 Software Development Applications

Immerse yourself in the dynamic world of game design and development and unleash your creativity through technology. This course is specially crafted to blend the artistic aspects of game creation with the technical skills of programming, using the renowned Unity Engine. Experience a unique journey from conceptualizing game ideas to bringing them to life in a digital realm.

TNL Welding Academy

12th grade

0.5 credit

This program is for Seniors who are interested in the field of Welding. This program is every other day for 5 hours for a year. At the conclusion of this program students will have earned both an OSHA 10 and Combination Welding Certifications, which include TIG and MIG welding.

The Fast Track Welding Entry Level certificate of completion is a 5 week/100-hour welding program that introduces the students to the fundamentals of welding.

Combination Welding is a certificate of completion that will run 10 weeks/200-hours that introduces students to the four main welding processes: MIG, STICK, Arc, and Gas welding.

Transformed Pathway Academy

The Transformed Academy is a Semester to two-year program where students will:

- Participate at the 11th and 12th Grade Level
- High School Courses: no prerequisite
- College Courses: none
- Summer Courses: none
- Industry Connection: Will work with customers and sit for their State Certification Test.

Course Description: Students seeking a license in Barber or Manicure will receive instruction and training at Transformed Barber and Cosmetology Academy.

The barber course consists of 1000 hours (2-year program ½ day) of theory and practical training in the arts and sciences of hairstyling, hair cutting, shaving, mustache and beard design, coloring, and permanent waving, chemical hair relaxing, thermal styling, anatomy, chemistry, bacteriology and sanitation, physical fitness, professionalism, retailing, equipment care, and salon management.

The manicure course consists of 400 hours of both theory and practical experience in many phases of manicuring and artificial nails. Their education will prepare them for the professional marketplace as well as give them the necessary knowledge to successfully complete the state board exam.

The Cosmetology course consists of 1500 hours (2 year program ½ day) of theory and practical training in the arts and sciences of hairstyling, hair cutting, coloring, permanent waving, chemical hair relaxing, thermal styling, anatomy, physical fitness, chemistry, bacteriology and sanitation, professionalism, retailing, equipment care, and salon management.

Zeta Truck Driving & CDL

12th grade

The Center School District has partnered with the Zeta Driving School, a top-rated CDL training school offering Kansas City, MO, truck driving classes and practice tests. Zeta Driving School are experts when it comes to CDL training. The programs are designed to give students comprehensive knowledge about driving commercial trucks while ensuring there is an understanding of the safety protocols one must follow on the road. Zeta is motivated to provide eligible students with the necessary skills to become expert drivers. Students who successfully meet all established requirements will become eligible to receive a Class A license. This is considered a universal license, as it allows you to drive multiple types of trucks and tractors.
