

HealthStart Academy

A Partnership between PREP-KC, Allen Village Charter School, Center School District, Grandview CSD-4 School District, Hickman Mills C-1 School District, UMKC School of Nursing and Health Sciences and City of Kansas City, MO Health Department

What is HealthStart Academy?

The HealthStart Academy will prepare urban high school students in the Kansas City region for postsecondary degree programs and careers in Health Sciences.

The HealthStart Academy is a multi-year program where students will:

- Engage during their 9th-11th grade year and continue through high school graduation.
- Complete academic coursework with a concentration in health sciences.
- Participate in work related experience (i.e. job shadowing, client connected projects, internships, Healthstart summer experience) with PREP-KC's health affiliates.
- Develop career-readiness and employability skills rooted in health sciences.

Student/family commitment:

- Students commit to completing all phases of the HealthStart program (including summer engagement).
- Students commit to completing work related experiences (i.e. job shadowing, internships, mentoring sessions, client connected projects, industry recognized credentialing programs).
- Students commit to remaining in good standings throughout their academic career.

There is no cost to the student/family to participate in this program.

HealthStart participants may earn and/or participate in the following Market Value Assets:

Complete dual-credit coursework related to health sciences, participate in client based projects and internships, complete industry recognized credentialing programs.

Who can apply?

Any student with a strong interest in Health Sciences attending Allen Village High School, Center High School, Grandview High School, and Ruskin High School.
