

Advanced Manufacturing

A Partnership between Grandview, Ruskin, Center High Schools

What is the Advanced Manufacturing Experience?

The Advanced Manufacturing Pathway is a 2 year program where students will:

- Participate at the 10th-12th Grade Level
- Take the following high school courses: Metals and Tools Technology, Computer Integration Manufacturing
 - Full scope of courses still being built out so could include opportunities for dual credit at the high school and/ or credential opportunities with MCC's Advanced Technical Skills Institute
- Summer Courses: Not at this time
- Make Industry Connections with KCNSC managed by Honeywell

There is no cost to the student/family to participate in this program.

Student/family commitment:

- Students commit to staying in the program and taking advanced manufacturing pathway classes.
- Students commit to completing work shadow experiences

Market Value Asset Earned:

- Possible college credit
- IRC

Who can apply? Any student who completes the introductory course Introduction to Engineering and/or Engineering Essentials

What are the requirements & suggested/not required prerequisites?

- GPA: 2.0
- Passing Grade of C or higher in Introduction to Engineering and/or Engineering Essentials
- Attendance: 90%

Participating schools:

- Grandview
- Ruskin
- Center
